VR SERIES UHF RADIO - VR 1500

IP66
Water Resistant

16 UHF
Channels

Increased
Talktime

The VR -1500 is a water resistant (IP66) professional two-way radio that offers the highest performance in the toughest environments. Engineered to meet Military Standard MIL-STD-810C, the VR-1500 radio is ideal for both personal & commercial applications.

FEATURES

Water Resistant & Dust Proof IP66
The VR-1500 is completely protected against dust ingress, and is also water resistant. Featuring a durable & rugged splash proof outer casing, The VR-1500 can deal for the toughest conditions.

16 Channel Capability
16 channel UHF CB Channels are pre-programmed, for everyday use with the ability to re-program commercial channels within the 450 to 520MHz range.

Increased Talktime
The VR-1500 uses a large 2100mAh capacity Lithium polymer battery, for up to 16 hours of use*.

Voice Encryption
The CTCSS/CDCSS encoder and decoder functions provide communication security against eaves-dropping.

GEXENON HID DRIVING LIGHTS

Visibility is the most important safety feature to the driver. That is why majority of the accidents occur at night or in poor weather conditions. XENON HID technology is the newest revolution in Automotive Lighting industry. Using XENON gas instead of traditional filament structures, XENON's put more light onto the road, increasing visibility and safety.

PERFORMANCE More than 450% light output* = Driving confidence

Utilising xenon gas instead of traditional filament , GE xenon burners produce 4.5 times the light output compared with ordinary halogen replacements. GE Xenons also uses 10% less power and operates cooler, prolonging headlamp reflector life. Light emitted is both intense and pure. Studies have shown that better lighting not only improves visibility but also stimulates concentration

FEATURES

- 7” High Impact Nylon Housing
- 30% Increased Brightness over Halogen Lamps
- Waterproof/ Dustproof/ Quake Proof
- Easily Installed into any Truck or 4wd
- Vibration Free Stainless Steel Mounting Bracket
- Designed for Heat Elimination

GE XENON 35W HID LIGHTING KITS

Visibility is the most important safety feature to the driver. That is why majority of the accidents occur at night or in poor weather conditions. XENON HID technology is the newest revolution in Automotive Lighting industry. Using XENON gas instead of traditional filament structures, XENON's put more light onto the road, increasing visibility and safety.

PERFORMANCE More than 450% light output* = Driving confidence

Utilising xenon gas instead of traditional filament , GE xenon burners produce 4.5 times the light output compared with ordinary halogen replacements. GE Xenons also uses 10% less power and operates cooler, prolonging headlamp reflector life. Light emitted is both intense and pure. Studies have shown that better lighting not only improves visibility but also stimulates concentration.

Xenon High Intensity discharge bulbs increase visible area in front of the driver by up to 50%. Vision is also improved within the illumination area because human vision response to the whiter, daylight colour of the light xenon bulbs produce.

*Comparisons made between a 35W HID bulb and 55W standard halogen bulb @ 14.4 volts.
